EDUCATION

UNIVERSITY OF WASHINGTON

Bachelor of Science in Computer Science and Systems - GPA: 3.5

Tacoma, WA

2024-PRESENT

(EXPECTED GRADUATION DATE: FALL 2026)

TACOMA COMMUNITY COLLEGE

Associate of Science in Computer Science - GPA: 3.7

Tacoma, WA

2022-2024

TECHNICAL SKILLS & COURSE WORK

- **Programming Languages:** Java, JavaScript, HTML, CSS, R
- **Frameworks & Libraries:** React, Tailwind CSS, Bootstrap, Android SDK, Node.js
- **Tools & Platforms:** Git, MySQL, IntelliJ, VS Code, Android Studio, Vite, Glide, OkHttp, Spring Boot, RStudio
- **Relevant Coursework:** Data Structures & Algorithms, Object-Oriented Programming, Software Development and Quality Assurance Techniques, Programming Languages Concepts

PROJECT EXPERIENCE

CNMI BAR ASSOCIATION MANAGEMENT SYSTEM (WEB APPLICATION) — IN DEVELOPMENT

JavaScript, HTML, CSS, Firebase, Firestore, Node.js, REST APIs, SendGrid, Cloud Functions

- Architected a full-stack web application with OTP and password authentication, role-based access control, and CRUD operations for member management.
- Built serverless Cloud Functions using Node.js for OTP verification and automated email delivery via SendGrid API.
- Designed NoSQL database schema with Firestore security rules, implementing input sanitization and session management to prevent XSS vulnerabilities.

DUNGEONDIVE (ROGUELIKE GAME)

Java, JavaFX, SQLite, JDBC, Jackson, JUnit 5, Maven, MVC Architecture, Factory Pattern, Builder Pattern

- Collaborated in a 3-person team to architect a procedurally generated dungeon crawler implementing Factory and Builder design patterns for O(1) character instantiation from SQLite queries.
- Developed responsive JavaFX UI components with dynamic scaling, custom sprite animations, and real-time minimap rendering across multiple screen resolutions.
- Engineered DFS-based dungeon generation algorithm ensuring 100% room connectivity, validated by 19 JUnit 5 test classes with JaCoCo coverage integration.

DEVELOPER PORTFOLIO

React, Tailwind CSS, Vite, Framer Motion

- Developed a responsive personal portfolio with smooth scroll-triggered animations and micro-interactions using Framer Motion.
- Implemented dark/light theme toggle with system preference detection and localStorage persistence.
- Built feature-based component architecture with centralized configuration for easy content management.
- Deployed to GitHub Pages with custom domain configuration and automated build pipeline.
